Wallbox eMH1 Basic
Item No. 1W1108

Wallbox eMH1 Basic
Item No. 1W2208

Wallbox eMH1
Item No. 1W1101

OVERVIEW

|		
11 kW Charging output	**22 kW** Charging output	**11 kW** Charging output
-	-	ADAC Motorwelt 12/2018 12 Wallboxen im Test **ADAC** **ABL** eMH1 (1W1101) baugleich mit (EVSE53) Max. Ladeleistung 11 kW **sehr gut (1,0)** **Test** **ADAC test winner** with top grade 1.0
6,35 m Charging cable	**6,35 m** Charging cable	**6,35 m** Charging cable
Type 2 Charging connector	**Type 2** Charging connector	**Type 2** Charging connector
Requires Type A RCCB onsite in the domestic power distribution	Requires Type A RCCB onsite in the domestic power distribution	Integrated Type A RCCB
Welding detection capability: the charging procedure will be terminated if a welded contactor is detected	Welding detection capability: the charging procedure will be terminated if a welded contactor is detected	Welding detection is activated on contactor welding

Item No. 1W1108	Item No. 1W2208	Item No. 1W1101

OTHER PROTECTIVE FEATURES

Temperature monitoring: if overheating is detected the system will automatically reduce the charging current

Temperature monitoring: if overheating is detected the system will automatically reduce the charging current

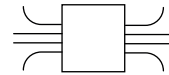

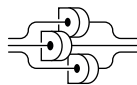

Temperature monitoring: if overheating is detected the system will automatically reduce the charging current

Electronic DC fault current detection

Electronic DC fault current detection

Electronic DC fault current detection

-

Phase current measurement protects against overload and asymmetry in all variants with a charging socket and the cable variant with 22 kW charging capacity

-
